

## Projects

This section lists my projects.

## Source

This is the source code of a Java program:

```
public class HelloWorldApp {  
    public static void main(String[] args) {  
        // Prints the string to the console  
        System.out.println("Hello World!");  
    }  
}
```

This is a fragment of HTML source code:

```
<!-- Fleurons are stylized flowers. -->  
<div class="center">  
  
</div>
```

The statement `System.out.println("Hello World!");` prints to the console.

Here is a nice table about Ubuntu Long Term Releases.

| Ubuntu Release   | Minimum Kernel | C Library | Size (MB) | Packages |
|------------------|----------------|-----------|-----------|----------|
| 14.04 LTS        | 2.6.32         | 2.19      | 190       | 46,273   |
| <b>16.04 LTS</b> | 3.2.0          | 2.23      | 109       | 54,520   |
| <b>18.04 LTS</b> | 3.2.0          | 2.27      | 55        | 59,624   |
